PROGRAM SERVICE STATEMENT

The programming American Family Association, Inc., (Family"), is designed to address a number of significant problems and public issues facing the proposed service area, including urban decay, unemployment, drug abuse, single-parent households and latch-key children. Programming will address each of these issues through news coverage and be examining them in greater detail in educational and audience participation programming.

Local news and call-in programs will highlight community concerns regarding the economic revitalization of the downtown area of communities throughout the station's coverage. To address the unemployment problem, programs will offered to identify available jobs and to teach individuals how to successfully apply for positions. Educational programs highlighting the drug problem and offering information about drug prevention and drug rehabilitation programs in the community will be offered.

In addition, programs will be offered to help single-parent families adjust to the competing needs of economic and personal fulfillment. The shortage of nursing home facilities in the area, as well as the loneliness of the elderly and shut-in, will be addressed by programs designed to make the community aware of the need for visitation and interaction with these groups.

EQUAL EMPLOYMENT OPPORTUNITY PROGRAM

I. General Policy

It will be our policy to provide equal employment to all qualified individuals without regard to their race, color, religion, national origin or sex in all personnel actions including recruitment, evaluation, selection, promotion, compensation, training and termination.

It will also be our policy to promote the realization of equal employment opportunity through a positive, continuing program of specific practices designed to ensure the full realization of equal employment opportunity without regard to race, color, or religion, national origin or sex.

To make this policy effective, and ensure conformance with the Rules and Regulations of the Federal Communications Commission, we have adopted an Equal Employment Opportunity Program which includes the following elements:

II. Responsibility for Implementation

Marvin Sanders will be responsible for the administration and implementation of our Equal Employment Opportunity Program. It will also be the responsibility of all persons making employment decisions with respect to recruitment, evaluation, selection, promotion, compensation, training and termination of employees to ensure that our policy and program is adhered to and that no person is discriminated against in employment because of race, color, religion, national origin or sex.

III. Policy Dissemination

To assure that all members of the staff are cognizant of our equal employment opportunity policy and their individual responsibilities in carrying out this policy, the following communication efforts will be made.

(1) The station's employment form will contain a notice informing prospective employees that discrimination because of race, color, religion, national origin or sex is prohibited and that they may notify the appropriate local, State, or Federal agency if they believe that they have been the victims of discrimination.

(2) Appropriate notices will be posted informing applicants and employees that the station is an Equal Opportunity Employer and of their right to notify any appropriate local, State, or Federal agency if they believe they have been the victims of discrimination.

(3) We will seek the cooperation of unions, if represented at the station, to help implement our EEO program and all union contracts will contain a non discrimination clause.

IV. Recruitment

To ensure non-discrimination in relation to minorities and women, and to foster their full consideration in filling job vacancies, we propose to utilize the following recruitment procedures:

(1) We will attempt to maintain systematic communications, both orally and in writing, with a variety of minority and women's

organizations to encourage the referral of qualified minority and female applicants.

1. Concerned Women for America

2. Women Aglow

3. Family Ministries

4. Eagle Forum

(2) In addition to the organizations noted above, which specialize in minority and female candidates, we will deal only with employment services, including State employment agencies, which refer job candidates without regard to their race, color, religion, national origin or sex. Examples of these employment referral services are:

1. Louisiana State Employment Services

2. Private Employment Agencies

3. When we recruit prospective employees from educational institutions such recruitment efforts will include area schools and colleges with significant minority and female enrollments. Educational institutions to be contacted for recruitment purposes are:

1. Louisiana State University, Alexandria, LA

2. Northwestern State University, Natchitoches, LA

3. Louisiana College, Pineville, LA

(4) When utilizing media for recruitment purposes, help-wanted advertisements will always include a notice that we are an Equal Opportunity Employer and will contain no indication, either explicit or implied, of a preference for one sex or another.

(5) When we place employment advertisements in printed media

some of such advertisements will be placed in media which have significant circulation or are of particular interest to minorities and women. Examples of publications to be utilized are:

1. Religious Broadcasting
2. Broadcasting
3. The Weekly News, Marksville, LA
4. AFA Journal

(6) We will encourage employees, particularly minority and female employees, to refer minority and female candidates for existing and future openings.

V. Training

(1) We will provide selected assistance to students, schools or colleges in programs designed to enable minorities and women to compete in the broadcast employment market on an equitable basis as funds become available.

AMERICAN FAMILY ASSOCIATION
EXHIBIT E-5
MARSKVILLE, LOUISIANA PROPOSED 201C
R.F. HAZARD STUDY

The proposed antenna will be energized such that it produces 100 kW ERP circularly polarized from a center of radiation of 370.0 meters above ground.

By using the formulas expressed in OST Bulletin, NO. 65, Oct. 1985, "Evaluating Compliance with F.C.C. Specified Guidelines for Human Exposure to Radio Frequency Radiation", published by the Federal Communication Commission's Office of Science and Technology and then by applying a combination of the element and array pattern as defined in E.P.A. study PB85-245868 (**"Engineering Assessment of the Potential Impact of the Federal Radiation Protection Guidance on the AM, FM, and TV Broadcast Services"**) using a ERI Rototiller type circularly polarized, it can be shown that the proposed antenna generates a maximum of 1.480051 mircowatts per square centimeter at a distance of 4 meters from the tower base and 6 feet above the ground. This value amounts to .1480051 percent of the maximum.

There are no other sources of AM, FM, or TV radiation on or near the tower consequently, the FM station will be in compliance with the Commission's rules regarding exposure to workers or the general public to levels of radio frequency radiation in excess of the American National Standard Safety levels with respect to human exposure to radio frequency electromagnetic fields, 300 KHz to 100 GHz. (ANSI 95.1-1982)

In regard to protecting workers at the tower site; should tower workers be required to work at the site where exposure would result in a non-ionization radiation level greater than the maximum A.N.S.I. standard, the applicant will cause the proposed FM antenna to cease radiating or will lower the power until the workers clear the area.

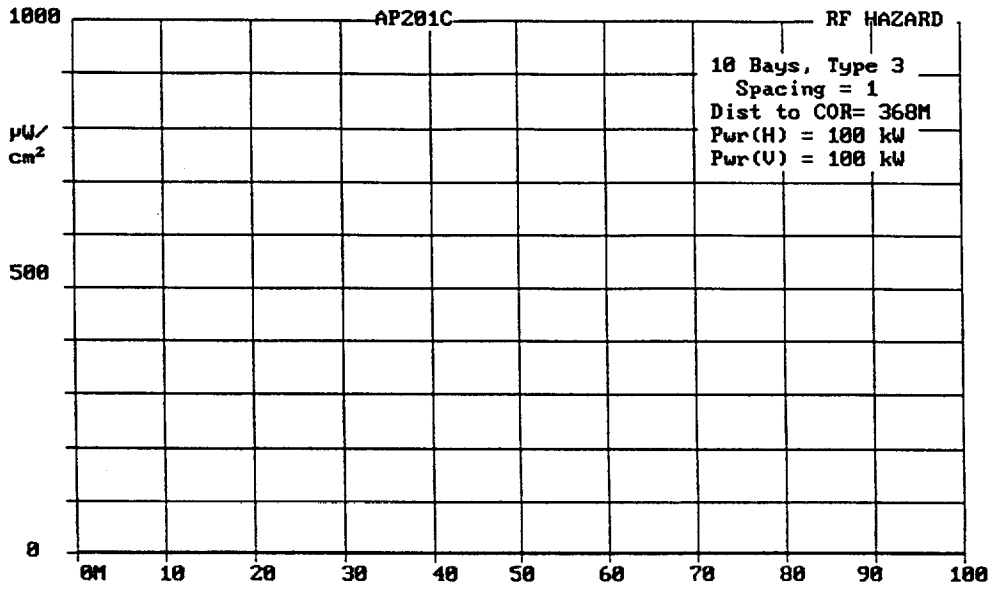

Exhibit E-6
American Family Association, Inc.
Marksville, Louisiana

REQUEST FOR WAIVER OF §73.1125

Petitioner American Family Association, Inc. ("Family") submits the following in support of its request for a waiver of the main studio rule set forth in §73.1125 of the Commission's rules:

1. Family is the licensee of WAFR-FM, Tupelo, Mississippi, a non-commercial educational FM broadcast station.

2. Family desires to obtain a Construction Permit, build, license and operate a non-commercial educational FM broadcast station in Marksville, Louisiana.

3. In order to obtain the economic benefits of centralized operations, as the Commission has recognized (Memorandum Opinion and Order in MM Docket 86-406, 3 FCC Rcd 5024 (1988)), Family intends to deliver its signal by satellite delivery from WAFR to the proposed broadcast facility in Marksville, Louisiana.

4. Family is cognizant of its local service obligations, and has developed a plan to allow it to determine local needs and respond to them in its programming. This plan will include, at a minimum, the following components:

(a) Family will add to its Community Advisory Board at least one resident of the community of license, who will be asked to provide recommendations on community needs and programming directly to the management of Family;

(b) Family will, at least annually, conduct interviews

with residents and community leaders to assess community needs and programming;

(c) Family will provide periodic local programming for Marksville, including coverage of significant local news or cultural events;

(d) Family will provide for the broadcast of local public service announcements;

(e) Family will maintain its public file within the community of license and will maintain a toll-free telephone number.

5. Because of the limited funding available to non-commercial educational broadcast stations, and the economic benefits of centralized operation, Family respectfully requests a waiver of the requirement of maintaining a main studio within the principal community contour, as provided in §73.1125(a)(4) of the Commission's rules.

P. O. Box 2440
Tupelo, MS 38803

B. Name, address and telephone number of proponent's representative if different than 3 above.

4. Location of Structure

A. Coordinates *(To nearest second)*	B. Nearest City, Town and State	C. Name of nearest airport, heliport, flightpark, or seaplane base
	Marksville, LA	Angola Air Strip (LA67)
31 ° 02' 00" Latitude	(1) Distance to 48 26 Miles	(1) Distance from structure to nearest point of nearest runway 7 miles
91 ° 38 ' 51 " Longitude	(2) Direction to 48 285.5 degrees	(2) Direction from structure to airport 146.6 degrees

5. Height and Elevation *(Complete to the nearest foot)*

A. Elevation of site above mean sea level	40
B. Height of Structure including all appurtenances and lighting *(if any)* above ground, or water if so situated	1272
C. Overall height above mean sea level *(A + B)*	1312

D. Description of location of site with respect to highways, streets, airports, prominent terrain features, existing structures, etc. Attach a U.S. Geological Survey quadrangle map or equivalent showing the relationship of construction site to nearest airport(s). *(If more space is required, continue on a separate sheet of paper and attach to this notice.)*

See Engineering EXhibit E-2

Notice is required by Part 77 of the Federal Aviation Regulations (14 C.F.R. Part 77) pursuant to Section 1101 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1101). Persons who knowingly and willingly violate the Notice requirements of Part 77 are subject to a fine (criminal penalty) of not more than $500 for the first offense and not more than $2,000 for subsequent offenses, pursuant to Section 902(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1472(a)).

I HEREBY CERTIFY that all of the above statements made by me are true, complete, and correct to the best of my knowledge. In addition, I agree to obstruction mark and/or light the structure in accordance with established marking & lighting standards if necessary.

Date	Typed Name/Title of Person Filing Notice	Signature
8/4/93	Thomas D. Scott, Chief Engineer	Thomas D. Scott

FOR FAA USE ONLY — *FAA will either return this form or issue a separate acknowledgement.*

The Proposal:

- [ ] Does not require a notice to FAA.
- [ ] Is not identified as an obstruction under any standard of FAR, Part 77, Subpart C, and would not be a hazard to air navigation.
- [ ] Is identified as an obstruction under the standards of FAR, Part 77, Subpart C, but would not be a hazard to air navigation.
- [ ] Should be obstruction [ ] MARKED, [ ] lighted per FAA Advisory Circular 70/7460-1, Chapter(s) _____
- [ ] Obstruction marking and lighting are not necessary.

Supplemental Notice of Construction FAA Form 7460-2 is required any time the project is abandoned, or

- [ ] At least 48 hours before the start of construction.
- [ ] Within five days after the construction reaches its greatest height.

This determination expires on _____ unless:

(a) extended, revised or terminated by the issuing office;
(b) the construction is subject to the licensing authority of the Federal Communications Commission and an application for a construction permit is made to the FCC on or before the above expiration date. In such case the determination expires on the date prescribed by the FCC for completion of construction, or on the date the FCC denies the application.

NOTE: Request for extension of the effective period of this determination must be postmarked or delivered to the issuing office at least 15 days prior to the expiration date.

If the structure is subject to the licensing authority of the FCC, a copy of this determination will be sent to that Agency.
